Primary Examiner, Art Unit 3621

**REASONS FOR ALLOWANCE**

1. This is an Examiner's statement of reason for allowance.
2. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-12 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail . . . ." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.
3. The closest prior art Kung (U.S. Pat. No. 5,442,342) which discloses an authentication method for a terminal. JP2004/242142 A, Matsuda, Noriyuki et al discloses a method of authenticating a subscriber terminal device. However, neither Kung nor Matsuda singularly or in combination discloses the recited feature:
4. As per claims 1, 10, 14, 17, and 20-26, "choosing one of the challenges for use in the terminal, and based on the challenge, determining a response and a key to be used with an aid of an identification device of the terminal essentially in the same way as in a subscriber identification module of the mobile communication system, determining an authenticator with an aid of the chosen key in the terminal, transmitting, from the terminal to the network, the authenticator and data, the data containing information

relating to the manner in which the authentication is formed and notifying the network with the aid of the data of which key corresponding to which challenge was chosen, and a check value with the aid of the chosen key in the network, and comparing the check value with the authenticator".

#### **EXAMINER'S AMENDMENT**

5. Please amend claims 1-5, 9-29 and 31-33 as follows: See attachment.

Authorized by Harry F. Smith, Reg. No. 32,493.

#### **Note**

6. The word "unit" has been changed to "device" throughout the claims, and therefore making it 101 ok.

Claim 17 recites a telecommunication network which is a server or computer, and therefore making it 101 ok.

The pre-amble of claims 24, 25 and 26 recite "where execution of the computer program controls at least one PROCESSOR to perform". The processor is performing or executing the program, and therefore making 101.

#### ***Conclusion***
